

Hydraulic Control Panel

Description

This panel is designed to operate 2 hydraulic chokes and 4 hydraulic valves. It is equipped with 1 Maxpro L15 air-hydraulic pump and 1 maxpro GX35 air-hydraulic pump. It has a 25 gallon hydraulic reservoir and a 5000 psi hand pump for back up. It also contains 2-5 gallon 3000 psi bladder style accumulators.

The panel has instrumentation to provide system pressure, valve, and choke operating pressure. There are two pressure gauges to monitor well or pumping pressures.

Features & Benefits

- Has two choke actuators and four valve actuators.
- Dual redundant hydraulic system.

Applications

- Choke Manifolds
- Frac Flowback Manifolds
- Flow Heads

Operating Specification

TYPE	Hydraulic Control Panel, 2 Chokes-4 Valves
HYDRAULIC PUMP - LOW STAGE	3,000 psi
HYDRAULIC PUMP - HIGH STAGE	10,000 psi
MANUAL PUMP	6,000 psi
ACCUMULATORS	25 Gal. reservoir
WORKING PRESSURE	10,000 psi
CONNECTIONS	High Pressure Quick Connections
DIMENSIONS L x W x H	4 ft. x 3 ft. 8 in. x 4 ft. 6 in.
WEIGHT	2,000 lbs.
